PRO SERIES

INTEGRATED WINCH MOUNT & PRE-WIRED

Designated mounting points and pre-wired connectors for a perfect fit and the strongest place to attach a Polaris Engineered winch - the most dependable winch for your Sportsman. With wiring built right into the vehicle, we made this the easiest winch to install on a Sportsman.

INTEGRATED PLOW MOUNT

The attachment points for the Plow System are integrated right at the factory and feature an innovative drive-up and go installation process.

ENHANCE YOUR RIDE

WITH INTEGRATED ACCESSORIES

Right from the factory, your vehicle is built to make essential accessories like winches and plows easy to use day-in and day-out. Mounting brackets are designed into the oversized factory bumper and wiring is routed securely and properly. When it comes to Sportsman, Polaris Engineered Accessories make work easier so you can get more done.

PRO SERIES

✓ Pre-wired chassis & no need to cut panels

Factory-installed wiring makes the controls simple to install. Mount the winch, connect the wires and trust that everything is routed safely, securely and properly.

- ✓ Tested 1,200+ pulls at max load
- ✓ Built to withstand -29° C temperatures
- ✓ Operates fully submerged underwater
- ✓ Military tested and approved

1 Sealed permanent magnet motor

2 Cut steel gears and sealed drivetrain

3 PREMIUM SYNTHETIC ROPE

With its lightweight, yet extremely strong, design and superior flexibility, this 15.2 m long synthetic rope is easy to handle and can stand up to any tough job.

4 RAPID ROPE RECOVERY 5x FASTER

Retrieve cable 5x faster than standard mode on other Polaris winches. Get back to riding or complete your task quicker.

5 AUTO STOP TECHNOLOGY

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

✓ WIRELESS REMOTE

This convenient remote operates your Polaris winch wirelessly from within 15.2 m of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- ✓ CUT STEEL GEARS & SEALED DRIVETRAIN
- ✓ SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

1. Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point
2. Set winch dial to L (Low) for maximum pulling power while winching your load
3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

With its lightweight, yet extremely strong, design and superior flexibility, this 15.2 m long synthetic rope is easy to handle and can stand up to any tough job.

This convenient remote operates your Polaris winch wirelessly from within 15.2 m of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

POLARIS EXTREME SYNTHETICS

PS-4 EXTREME SYNTHETIC 0W-50

- Our best extreme high and low temp formula, excellent for high temperatures and racing, even at temps of 54°C, plus easier cold starting even below -42°C
- Expect the best in wear protection thanks to premium PAO and ester base stocks combined with a balance of moly and ZDDP additives
- Polaris exclusive clean engine additive system reduces deposits and carbon build-up for peak performance and power

THE BEST PROTECTION, MAXIMUM PERFORMANCE

- Powersports grade full synthetics provide long lasting engine protection
- At least 40% improved wear protection compared to all aftermarket oils tested (see engine wear test chart)
- Polaris exclusive clean additive system
- At least 50% less deposits than all aftermarket oils tested (see deposit test chart)
- Cleaner engine with less deposits means consistent maximum power and performance

WIDEST VISCOSITY FOR ULTIMATE PROTECTION

ENGINE WEAR TEST

LOWER NUMBER = LESS ENGINE COMPONENT WEAR
LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of the tested products. Numbers represent mm of wear scarring measured. Test measures wear at contact points, wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to the next closest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measures mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.

THE AMERICAN POWERSPORTS CO.

The Polaris story begins with a relentless drive to explore what's outside, to test our potential.

It all began here in America—over 70 years ago—in a small factory in Roseau, Minnesota. There, our founders forged a company built on American values, grit and ingenuity.

That factory is not so small anymore and still operates to this day, and in 2014, a new era began as our European factory assembled its first vehicles in Opole, Poland. This expansion channelled our American legacy to the heart of Europe. Our factories build the best powersports machines that America has to offer, working alongside our design, development, and testing departments as we strive to create vehicles that move you.

Today, we continue to design, engineer, and test our industry-leading vehicles across the world on dirt, sand, snow and soil with owners like you in mind.
